Version 1.3

Stitch Palettes

Slide your finger left and right over the Stitch Carousel at the top right to rotate between stitch palettes.

What does the # mean? It means *flexibility*!

- Tap a stitch that shows a # or 1 and a popup appears asking you for more information.
- To dismiss the popup without setting additional information, tap the screen outside of the popup.
Favorites Bar

Double-tap a stitch in the palette to add it to your Favorites Bar.

- Easily access stitches across all stitch palettes.
- Toggle to *Full Screen* to make the most of the entire screen. Your chart fills the entire screen without the menus, stitch palette, or icons.
- Don't want a stitch in your Favorites any longer? *Double-tap* to remove it.
ColorGenius

Use color in your chart for easier reading and enhanced meaning!

Fill a stitch with color.

All cable and some texture stitches allow you to fill the interior of the stitch with color.

Color the background.

White is the default background color, select a different background color from *Colorwork* in the Stitch Carousel.

Color your stitch symbols.

Each stitch symbol is black by default, tap the *Color Palette* button located below the stitch palette and change the color.

KeyGenius

Customize your keys.

- Create your preferred abbreviations and definitions for any symbol.
- Differentiate the meaning of any colors used in your chart.
